## REPORT on the TAKAVARASHA PEANUT BUTTER - MAKING PROJECT

By Pastor Cathias Mapiyawo to Loxley and Holroyd New Life Church, NSW.

April 2010

We thank you for the support and encouragement by way of providing packaging material.

Viability of the project has improved the lives and confidence of the ten women involved. Presentation of their quality product at an Agricultural Show held at Takavarasha in Chivi district won them the first prize at the Show of two 20 litre buckets, one 5 litre bucket, and fifty-two 300ml jam jars for peanut butter packaging.

The ladies boosted peanut production by allocating much of their land to peanut growing. A good yield is expected this year which will keep the women in business. The product is encouraging other widows in the church and community to engage themselves in small businesses to improve quality of life.

We propose to have small machines like Freezit-making machines to engage another group of ten. Market for Freezits is available in the nearest township and schools.
